PROFESSIONAL SUMMARY

Self-taught Full-Stack MERN Developer with hands-on experience building scalable, real-time web applications using JavaScript and TypeScript. Skilled in designing RESTful APIs, implementing clean and layered backend architectures, and integrating secure payment and communication systems. Experienced with MVC and monolithic architecture patterns, schema design, and real-time features using Socket.IO and WebRTC. Strong analytical foundation in Data Structures and Algorithms, with a drive to build innovative, maintainable software.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL

Frontend: React.js, Next.js, Redux, Redux Toolkit, WebSocket, Tailwind CSS, Bootstrap, shadcn, Material Tailwind, HTML5, CSS3

Backend: Node.js, Express.js, RESTful API Development, MVC Architecture, Monolithic Architecture, Clean Architecture, Layered Architecture, Schema Design, OAuth 2.0

Databases: MongoDB, PostgreSQL, Redis, Firebase

Integrations and Libraries: Socket.IO, WebRTC, Stripe, Razorpay, Cloudinary, Nodemailer, Multer, Resend

Cloud, DevOps & Deployment: AWS, NGINX, Vercel, CI/CD Pipelines, Docker (Learning)

Tools and Platforms: Git, GitHub, Postman, Thunder Client, VS Code, Figma, Canva

Data Structures and Algorithms: Linked List, Hash Map, Tree, Graph, Heap, Trie

PROJECTS

Takecare – Doctor Appointment Booking Platform

[Live](#) | [GitHub](#)

MongoDB, Express.js, React, Node.js, Socket.io, WebRTC, JWT, Razorpay, AI Integration

- Developed a comprehensive healthcare platform featuring secure patient-doctor interactions, automated appointment tracking, and AI-driven consultation assistance
- Implemented secure patient authentication using JWT tokens and profile management systems
- Developed slot booking functionality allowing patients to choose between Video Call or Chat consultations
- Integrated Razorpay for secure payment processing and implemented a structured refund policy
- Created a real-time appointment tracker with a progress bar and integrated an AI Assistant to help patients find suitable doctors

Lapedge – E-Commerce Laptop Store

[Live](#) | [GitHub](#)

Node.js, Express.js, MongoDB, React, Bootstrap, EJS, MVC Architecture, Razorpay

- Developed advanced filtering and search capabilities to help users find specific laptop models easily
- Integrated secure payment gateways, coupon systems, and promotional offers
- Implemented features for order tracking, history management, and automated invoice/bill downloads

EDUCATION

Brototype

Calicut, Kerala

Brocamp Full-Stack Development Program

Completed intensive training covering MERN stack development, backend architecture patterns, RESTful API design, data structures, and cloud deployment on AWS.
